Perfume Machines

Perfume Machines

The image shows two industrial perfume machines on a wooden surface. The machine on the left is a tall, thin stand with a horizontal arm and a vertical rod. The machine on the right is a more complex, multi-tiered structure with various components and a base. Both machines are made of metal and appear to be used for packaging or processing perfume.

Durable, Strong Machinery

These machineries helps you for your product packaging. The machines are 100% high quality, very easy to use, and the machines are very accurate.

Manual Crimping Machine

Crimps your perfume pumps on your perfume bottles. To use, simply adjust, place the bottle underneath and press the lever to crimp.

Pneumatic Dip Tube Cutting Machine

Dip Tube with V shape. Put the dip tube inside the hose & press it from top to cut the tube into V shape. Adjust the height before use.

Pneumatic Filling Machine Single Head

Fills your perfume bottles accurately and easily. To use, simply adjust, place bottle underneath and press pedal to fill bottle.

Perfume Machines

Pneumatic Filling Machine Double Head

Fills your perfume bottles accurately and easily. To use, simply adjust, place bottle underneath and press pedal to fill bottle.

Pneumatic Crimping Machine

Crimps your perfume pumps on your perfume bottles. To use, simply adjust, place the bottle underneath and press the pedal to crimp.

Pneumatic Collar Fitting Machine

Pushes collar onto perfume pumps easily. To use, adjust accordingly, place the bottle underneath and press the pedal to let it fit your collars.

Perfume Machines

Cellophane Wrapping Machine

Wrap your boxes in cellophane plastic material. This will make your product packaging boxes last longer and protect from unauthorised usage of product.

Pneumatic Four Headed Filling Machine

Fills your perfume bottles accurately and easily. To use, simply adjust the filling time, place bottle underneath and let it fill the bottles.

Manual Collar Machine

Pushes collar onto perfume pumps easily. To use, adjust accordingly, place the bottle underneath and press the pedal to let it fit your collars.

Perfume Machines

Negative Ion Dust Collector Machine

Clears dust from your empty perfume bottles. To use, simply adjust, place bottle on the vacuum and let it suck the dust out of the bottle

Semi Automatic V Groove Machine

Helps you to create seamless and unique product packaging cardboard boxes. This cuts cardboard boxes which are very different from normal boxes.

Gluing Machine

Adds a layer of glue on your cardboard boxes.

Perfume Machines

Semi Automatic Cellophane Sealing Machine

Seals cellophane wrapping on your product packaging boxes. Two types available: max width 260mm, max width 360mm

Manual Crimping Collar Fitting Machine

A manually operated machine with two heads: collar heads and crimping head, enabling dual function machine for easy use.

Tapes & Magnets

Durable Neodymium Magnets And Packaging Tapes

Strong attraction magnets and high quality tapes for
product packaging

Tapes & Magnets

3M Premium Hot Stamping Mould Tape

Product Code: PPT11-3M

Hot stamping tape is a type of adhesive tape that is used in the hot stamping process. It is typically made of polyester or polyimide film with a heat-resistant adhesive on one side.

Zinc Coated Neodymium Magnets 20mm×5mm×2mm

They can be used to create magnetic closure boxes. They can also be used to attach labels and other packaging materials to your products.

Zinc Coated Neodymium Magnets 10mm×5mm×2mm

They can be used to create magnetic closure boxes. They can also be used to attach labels and other packaging materials to your products.
